Mr. Patrick Lapasset  
Direction Generale de l'Aviation Civile  
50, rue Henry Farman  
F-75720 Paris Cedex 15  
France

Dear Mr. Lapasset:

This letter refers to ELTA (CEIS TM), letter Ref. 00B60175, dated January 18, 2000, by which they made application for Technical Standard Order (TSO) design approval. This letter also acknowledges receipt of ELTA (CEIS TM), Statement of Conformance dated January 18, 2000 and of DGAC France letter Ref. 2000/00748/SFACT/N.ME, dated February 3, 2000, certifying in accordance with FAR 21.617, that the remote control panels listed below comply with the requirements of TSO C91a and TSO C126, as designated in FAR 21.305(b).

Based on the DGAC France certification and receipt of the required data, we hereby accept ELTA (CEIS TM), TSO design approval to include the remote control panels listed below for manufacture at ELTA (CEIS TM), located at 11, Avenue Didier Daurat, 31702 Blagnac Cedex, France.

<u>Type</u>	<u>Description</u>
P/N 93N6035	Remote control panels
P/N 96N9030	
P/N 97N902(x)	

This letter of TSO design approval, together with the DGAC France Certificate of Airworthiness for Export, will authorize ELTA (CEIS TM), to identify the remote control panels with the TSO marking requirements described in FAR 21.607(d) and in TSO C91a and TSO C126 and is issued in accordance with FAR 21.617, governing issuance of TSO design approval for import appliances. Each item must be accompanied by a Certificate of Airworthiness for Export issued by the DGAC France or a duly authorized designee/organization (FAR 21.502(a)).

Any deviations from the established design approval should be accomplished in accordance with FAR 21.609. The request for approval to deviate, together with all pertinent data, should be submitted to the Federal Aviation Administration (FAA) through the DGAC France and should contain information to show that the particular deviation is compensated for by factors or design features providing an equivalent level of safety.

The following statement must be furnished with each manufactured unit: "The conditions and tests required for TSO approval of this article are minimum performance standards. It is the responsibility of those desiring to install this article either on or within a specific type or class of aircraft to determine that the aircraft installation conditions are within the TSO standards. If not within the TSO standards, the article may be installed only if further evaluation by the applicant documents an acceptable installation and is approved by the Administrator."

A letter of TSO design approval issued under FAR 21.617 is not transferable and is effective until surrendered, withdrawn or otherwise terminated by the FAA (FAR 21.621).

The FAA may, upon notice, withdraw the letter of TSO design approval of any manufacturer who identifies with a TSO marking any article not meeting the performance standards of the applicable TSO (FAR 21.619). The DGAC France airworthiness certification is essential to the determination that the item meets the performance standards of the applicable TSO.

If there are any questions, please feel free to have your staff contact Gregory A. Edwards.  
(Tel.: 322.508.2714).

Sincerely,

A handwritten signature in black ink that reads "Gregory A. Edwards". To the left of the signature, the word "for" is written in a smaller, cursive script.

John R. Colomy  
Manager, Aircraft Certification Staff  
FAA-Brussels
